DETAILED ACTION

1. Claims 26-47 and 51-52 are presented for examination.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 18, 2006 has been entered.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 26-47 and 51-52 are rejected under 35 U.S.C. 102(e) as being anticipated by Mikurak, US Pat. No. 7,130,807 B1.

Art Unit: 3691

As to claim 26, Mikurak discloses a computer program product comprising:
a computer readable medium having computer readable program code embodied therein (col. 25, lines 32-37 and col. 307, lines 28-31),
said computer readable program code configured to:
obtain a first business process data from at least one first trading participant (col.3, lines 3-5 and col. 307, lines 37-40), said first business process data comprising a set of transaction messages having a first data format (col. 10, lines 1-25) in accordance with a first standard protocol for conducting business transactions (col. 14, lines 22-28);
process said first business process data at a process management platform accessible via an interconnection fabric (col. 3, lines 1-5 and col.9, lines 51-57), wherein said process management platform is configured to manage the flow of said transaction messages and monitor said transaction messages (col. 15, lines 54-59), wherein said process management platform is configured to automatically determine a second one of a plurality of trading participants to satisfy, said first business process data (col. 24, lines 33-50); generate a second business process data from said first business process data using a second data format in accordance with a second standard protocol for conducting said business transactions with said second one of said plurality of trading participants (col. 24, lines 51-58); and transmit said second business process data from said process management platform to said second one of said plurality, of trading participants (col. 24, lines 51-58).

Art Unit: 3691

As to claim 27, Mikurak discloses the computer program product of claim 26 wherein said computer readable program code configured to obtain said business process data executes at a process gateway (i.e. computerized framework manager; Abstract, col. 3, lines 1-19 and col. 15, lines 45-60).

As to claim 28, Mikurak discloses the computer program product of claim 26 wherein said process gateway interfaces with at least one legacy system (col. 9, lines 51-57) at said at least one first trading participant and said second one of said plurality, of trading participants (col. 15, lines 45-53).

As to claim 29, Mikurak discloses the computer program product of claim 26 wherein said process management platform broadcasts said first business process data to [[a]] said plurality of trading participants (col. 24, lines 51-58).

As to claim 30, Mikurak discloses the computer program product of claim 26 further comprising:
computer readable program code configured to modify said first business process data to conform said first business process data to a uniform format (col. 11, lines 28-36 and col. 13, lines 26-35).

As to claim 31, Mikurak discloses the computer program product of claim 26 wherein said processing further comprises:

Art Unit: 3691

archiving said first business process data in a storage medium (col. 9, lines 35-43 and col. 25, lines 32-37).

As to claim 32, Mikurak discloses the computer program product of claim 31 further comprising:
computer readable program code configured to provide said archived first business process data to an entity for non-repudiation purposes (col. 23, lines 56-66, and col. 25, lines 36-37).

As to claim 33, Mikurak discloses the computer program product of claim 26 wherein said first business process data comprises at least one partner interface process (col.23, lines 37-67 and col. 24, lines 1-18).

As to claim 34, Mikurak discloses the computer program product of claim 26 wherein said first business process data comprises technical information (col.23, lines 37-67 and col. 24, lines 1-18).

As to claim 35, Mikurak discloses the computer program product of claim 26 wherein said first business process data comprises item acquisition data (col.23, lines 37-67 and col. 24, lines 1-18).

Art Unit: 3691

As to claim 36, Mikurak discloses the computer program product of claim 26 wherein said first business process data comprises service acquisition data (col.23, lines 37-67 and col. 24, lines 1-18).

As to claim 37, Mikurak discloses the computer program product of claim 26 wherein said at least one trading participant comprises an entity utilizing said first business process data (col.23, lines 37-67 and col. 24, lines 1-18).

As to claim 38-41, Mikurak discloses the computer program product of claim 37 wherein said entity comprises a purchaser (col. 15, lines 45-53), wherein said entity comprises a supplier (col. 15, lines 45-53), wherein said entity comprises a distributor (col. 15, lines 45-53), wherein said entity comprises a manufacturer (col. 15, lines 45-53).

As to claim 42, Mikurak discloses the computer program product of claim 37 wherein said process management platform comprises a plurality of distributed systems (col. 15, lines 45-49 and Fig. 2).

As to claim 43, Mikurak discloses the computer program product of claim 37 wherein said process management platform comprises a business process interface associated with said at least one trading participant and said at least one second interface (col. 24, lines 55-64).

As to claim 44, Mikurak discloses the computer program product of claim 37 further comprising:
computer readable program code configured to provide said at least one first trading participant and at least one second trading participant access to a business process interface (col. 307, lines 28-53).

As to claim 45, Mikurak discloses the computer program product of claim 44 wherein said business process interface is provided via a web browser (col. 14, lines 22-28).

As to claim 46, Mikurak discloses the computer program product of claim 44 wherein said business process interface facilitates the transmission of data comprising at least a portion of said business process data (col. 15, lines 45-59).

As to claim 47, Mikurak discloses the computer program product of claim 44 wherein said business process interface facilitates the formatting of data comprising at least a portion of said business process data (col. 13, lines 26-35).

Art Unit: 3691

As to claim 51, Mikurak discloses a computer program product (Abstract and col. 15, lines 45-53) comprising:
a computer readable medium having computer readable program code (col. 25, lines 32-37 and col. 307, lines 28-31), for managing a plurality of business processes (col. 3, lines 1-3 and col. 15, lines 45-60), said computer readable program code configured to:
obtain a plurality of business processes from a plurality of first entities (col. 15, lines 45-49) wherein said plurality of business processes comprises a sequence of messages linked by a predefined workflow and exchanged over a predefined period of time (col. 11, lines 28-36, col. 12, lines 23-28, col. 13, lines 26-35 and col. 14, lines 19-26);
manage said plurality of business processes at a process management platform (col. 15, lines 54-59); forwarding said plurality of business processes from said process management platform to at least one of a plurality of second entities automatically determined to be configured to fulfill said plurality of business processes (col. 24, lines 33-50).

As to claim 52, Mikurak discloses the computer program product of claim 51 wherein said computer readable code configured to manage said plurality of business processes at said process management platform further comprises computer readable program code configured to:
format each of said plurality of business processes to conform to a predefined format when said plurality of business processes does not conform to said predefined format (col. 13, lines 26-35);

Art Unit: 3691

archive said plurality of business process (col. 25, lines 36-37).

Response to Arguments

4. Applicant's arguments with respect to claims 26-47 and 51-52 have been considered but are moot in view of the new ground(s) of rejection.
